

## Feedback for RRMP Statistical worksheets [Formative]

<b>Tutor completing formative feedback:</b> Karen Outram	<b>Student number:</b> Nomusa Majola
<b>Details of any extensions etc:</b>	<b>Submission Attempt:</b> Formative

Thank you for submitting your statistical worksheets.

The formative is completed to a very good standard, reflecting the appropriate qualitative, [written] statistical outcomes and variables from the questions posed in the formative, and the exercises responded to in Units 8 and 9.

Quantitatively it would have appropriate to add bar charts to interpret data as well as, qualitative discussion to consolidate quantitative findings. This point is something to consider for your Unit 12 e-portfolio. Statistics are a key part of the Unit 12 e-portfolio, and this is a good example regarding how to reflect extensive statistical information responding to a formative that will then become an artefact for your e-portfolio.

Please now add this formative outcome as an artefact to your final e-portfolio, as this artefact is an ESSENTIAL part of the e-portfolio, which is graded as a summative outcome in Unit 12.

With best wishes

Karen
